🌐 [linked-in](#) 🐙 [GitHub.com](#) 📁 [Portfolio](#)

CAREER OBJECTIVE

Full-Stack Software Developer with 2+ years of experience building scalable web applications using MERN stack, Next.js, and Python. AI/ML integration, cloud deployment (AWS, Vercel), and automation workflows using n8n.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, C++ — **DataBase:** PostgreSQL, MySQL, MongoDB Atlas
- **Front-end:** React.js, Next.js, Redux, RTK-Query, Tailwind CSS — **Tools :** n8n, Web Scraping, BeautifulSoup
- **Back-end :** Node.js, Express.js, FastAPI, Flask — **Cloud/DevOps:** Git, GitHub, CI/CD, Docker, Vercel, AWS
- **AI/ML :** OpenAI/Gemini AI, LLM, LangChain, ML **Data Science:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Professional Experience

Software Development Engineer -1 — [WebOum Technology Pvt. Ltd.](#) **Mohali, Punjab** / Mar 2025 - Present

- Architected and delivered complete WebOum company website using Next.js framework, achieving 100 security compliance and 40 faster load times compared to competitor sites performance compared to competitor websites.
- Designed and deployed machine learning-based phishing detection system using Random Forest and XGBoost algorithms, improving threat detection accuracy by 85.
- Property management dashboard using React.js frontend and PHP backend with MySQL database, integrating third-party REST APIs for real-time data synchronization.

Software Development Engineer — [Fitelo Pvt Ltd](#) **Mohali, Punjab** / Oct 2023 – Jan2025

- Engineered enterprise-grade MERN stack web application serving 100+ daily active users with 99.9 uptime reliability.
- Developed and maintained RESTful API infrastructure handling 1,000+ monthly requests using Node.js and Express.js with comprehensive error handling.
- Implemented JWT authentication, role-based access control, and secure API endpoints.

Industrial Projects

Phishing Detection System — ML · RF · XGBoost · LSTM · Scikit-learn · NumPy · Pandas — [Project](#)

- Developed machine learning classification model for malicious URL detection using Random Forest and XGBoost algorithms, achieving 94 accuracy rate.
- Engineered 25+ URL-based and HTML-attribute features including domain age, SSL certificate validation, and lexical analysis
- Deployed the model as a REST API for real-time URL analysis and automated threat detection.

AI Finance SaaS Platform — MongoDB · Stripe · Gemini AI · TypeScript · Cloudinary — [Project](#)

- Built full-stack AI finance management platform with automated receipt scanning using Google Gemini AI OCR technology.
- Integrated Stripe payment gateway with subscription management, supporting free trials, recurring billing, and webhook event handling.
- Developed a scalable back-end with JWT authentication, Cron jobs, and cloud service integration.

Best Properties / WebOum Website — Next.js · React.js · MySQL · REST API · PHP — [Project](#)

- Real estate websites for WebOum and Best Properties with server-side rendering using Next.js 14.
- implemented MySQL relational database schema with 15+ tables for property listings, user management, and transactions.
- PHP admin dashboard with dynamic property CRUD, advanced SEO and image optimization reducing load time by 55.

Educational / University

Masters of Computer Applications [Uttarakhand Technical University](#)
Bachelor of Commerce [Mahatma Jyotiba Phule Rohilkhand University](#)
